

**Pacific Northwest University
Of Health Sciences
Years III and IV Clerkship Curriculum
Student Clinical Rotation
Rheumatology/Immunology**

Course Title:	RHEUMATOLOGY/IMMUNOLOGY – IM 717 & 717S
Credit Hour:	4-8 credits
Rotation Length:	2-4 weeks
Prerequisites:	Successful completion of IM 701 & IM 702

Syllabus Components:

1. Rotation Description, Purpose and Philosophy
2. Rotation Objectives
3. Orientation to Rotation
4. Required Activities and Assignments
5. Student Performance Evaluation
6. Recommended Resources
7. Standards of Professional Conduct
8. Tips for Successfully Completing the Rotation

Last update: 12/30/11

This syllabus has been reviewed by the Curriculum Committee and Dean's Council with final approval by the Dean.

1. Rotation Description, Purpose, and Philosophy

The purpose of this 2- 4-week experience is to provide the student with exposure to commonly encountered cases in Rheumatology/Immunology. To accomplish this, the rotation provides broad exposure to both chronic and acute problems, experience in appropriate consultation, outpatient diagnostic testing, patient education and other procedures. To achieve rotation objectives, the student is expected to apply the concepts of diagnosis and management for all phases of outpatient care and, if relevant, develop a working knowledge of both inpatient and outpatient treatment modalities. Throughout the rotation, students will assume as much responsibility for patient care as is commensurate with his/her preparedness.

2. Rotation Objectives

A set of learning objectives for this rotation is provided below. The objectives are intended to be a guide for the student's learning activities and serve as a baseline for assessment of the student's enhanced knowledge, skills, and professional behavior. Not all of the objectives listed below will be encountered during any single rotation. While each student is expected to further expand his/her knowledge base and to care for all assigned patient cases, he/she is also expected to avail him/herself of the educational materials provided and to master the following objectives.

Interpersonal and Communication Skills Objectives:

1. Obtain through an interview, a thorough and accurate medical history of any patient, regardless of age, ethnic or socioeconomic origins. Take into account a patient's mental state, motivation for seeking treatment and ability to communicate. Employ appropriate interviewing techniques, making sure that there is full understanding between the physician and the patient.
2. Communicates effectively with attending, resident, team members and other health care professionals.
3. Documentation in medical records is legible and timely
4. Communicates appropriately and professionally to patient and family members
5. Demonstrate appropriate use of telephone, e-mail, and other communication modalities and acts professionally in communicating with patients and other members of the health care team.

Medical Knowledge:

To advance the student's knowledge of the clinical presentation, basic pathophysiology, evaluation, and management of diseases frequently encountered in the outpatient medical setting, with an emphasis on patient management strategies and treatment modalities.

1. Describe Classification Criteria and Clinical Features of various Connective tissue diseases (RA, SLE, Sjögren's Syndrome, Scleroderma, Polymyositis/Dermatomyositis/Inclusion Body Myositis, Overlap Syndrome including Mixed Connective tissue disease, Polymyalgia Rheumatica.)
2. Describe Classification Criteria and Clinical Features of Seronegative Spondyloarthropathies

- (Ankylosing Spondylitis, Psoriatic Arthritis, Reiter's Syndrome, Arthritis associated with Inflammatory Bowel Disease)
3. Discuss current treatment options for Rheumatoid Arthritis
 4. Recognize Clinical Presentations, Pathophysiology and Rationale of Treatment of Common Crystal Arthropathies (Gout, Pseudogout)
 5. Describe clinical features and treatment options of Osteoarthritis.
 6. Describe diagnostic criteria (including interpretation of DXA results), Clinical Features and Treatment options of Osteoporosis.
 7. Describe clinical features and discuss various treatment options of Fibromyalgia
 8. Recognize physical examination findings of following Non-Articular and Regional Musculoskeletal disorders that differentiate them from systemic inflammatory conditions (Tendinitis, Bursitis, Enthesitis, Carpal Tunnel/Cubital Syndrome)
 9. Differentiate between inflammatory and non-inflammatory back pain and list various causes in each category.
 10. Classification Criteria of important Vasculitides (Temporal Arteritis, Takayasu's Arteritis, PAN, Wegener's Granulomatosis, Hypersensitivity Vasculitis, Cryoglobulinemic vasculitis)

Clinical Skills Domain

During this elective rotation, the student is expected to function as an integral member of a clinical team responsible for the care of patients in an ambulatory/outpatient setting, under the direct supervision of attending physicians and/or intern/residents. At the conclusion of the rotation, the student will:

The expected level of student engagement in the skills being developed: Observe (O), Assist (A), Master (M).

1. Rheumatologic history: understand principles and assist in obtaining a clinical history, relevant review of systems, and functional status of patients with rheumatic disease symptoms (A).
2. Physical examination: understand principles and demonstrate competency in performing and interpreting the examination of the structure and function of all axial and peripheral joints, periarticular structures, peripheral nerves, and muscles. Additionally, the student should be able to identify extraarticular findings that are associated with specific rheumatic diseases (M).
3. Diagnostic Arthrocentesis: understand the anatomy, precautions including OSHA requirements, and potential sequelae of arthrocentesis and observe and assist in the procedure of obtaining synovial fluid from diarthroidal joints, bursae, and tenosynovial structures (A).
4. Therapeutic aspiration and injection: understand the anatomy, precautions, and potential sequelae of and assist in and if circumstances permit, perform the therapeutic aspiration and/or injection of diarthroidal joints, bursae, tenosynovial structures, trigger points and entheses (A and M).
5. Learn to interpret the results of various laboratory test used in rheumatology (including but not limited to): sedimentation rate, C-reactive protein, rheumatoid factor, antinuclear antibodies, anti ds DNA, anti SS-A/Ro, anti SS-B/La, anti U1 RNP, anti Sm, antiribosomal P, anticentromere, antitopoisomerase 1, anti-Jo-1, anti PM-Scl, antineutrophil cytoplasmic

antibodies, cryoglobulins, complement component levels, CH50, serum protein electrophoresis, lupus anticoagulant, anticardiolipin antibodies, HLA typing (e.g., HLA B27), antihistone antibodies, ASO and other streptococcal antibody tests, Lyme serologies, serum and urine uric acid levels (M).

6. Plain radiographs: demonstrate basic understanding of radiographs of normal and diseased joints, bones, and periarticular structures (M).
7. Demonstrate the ability, appropriate for the level of training of the individual, to construct a differential diagnosis in patients presenting with signs and symptoms related to rheumatologic diseases and to outline further testing necessary to establish the correct diagnosis (M).
8. Pharmacology: for each medication, understand the dosing, pharmacokinetics, metabolism, mechanisms of action, side effects, drug interactions, compliance issues, costs, and use in patients including fertile, lactating, and pregnant women, patients with heart or chronic renal or liver disease (M).
 - a. Nonsteroidal anti-inflammatory drugs including Coxibs
 - b. Glucocorticoids: topical, intraarticular, systemic
 - c. Systemic antirheumatic drugs: antimalarials, sulfasalazine, methotrexate, Leflunomide
 - d. Immunomodulators: biologics (anti-TNF, B-cell depleting agents, T-cell inhibitors)
 - e. Hypouricemic drugs: allopurinol, sulfinpyrazone, probenecid
9. Demonstrate the ability to identify physical impairment; relate the impairment to the observed functional deficits (M).
10. Psychosocial aspects: understand the impact that the following factors have on the overall therapy of a patient with rheumatic disease and demonstrate knowledge of what can be done to assist a patient in these areas (M).
 - a. Psychologic and emotional factors
 - b. Economic and vocational issues: vocational rehabilitation, costs of therapy and monitoring
 - c. Compliance issues
11. Demonstrate knowledge of the characteristics of the most commonly prescribed drugs, including pharmacokinetics, pharmacodynamics, indications for use, contraindications, appropriate dosage, common side effects, drug interactions, interactions with foods, potentials for abuse, cost-effectiveness and inpatient versus outpatient use.
12. Be aware of the adverse effects of drugs and drug combinations on particular patient populations, such as the elderly, children, pregnant women, nursing mothers and their infants, substance abusers, patients with allergies, and patients with chronic diseases or disorders.
13. Demonstrate similar knowledge of the over-the-counter drugs that are commonly used by patients.
14. Demonstrate ability to skillfully perform osteopathic structural examination, make diagnosis of somatic dysfunction, and perform appropriate osteopathic manipulative treatment where indicated.

Patient Care Objectives:

1. Demonstrate knowledge of patient-monitoring procedures to assess improvement, deterioration or change of status.
2. Demonstrate the ability to communicate effectively and interview patients and families in various clinical settings.
3. Perform complete and time-efficient physical examinations of patients. Demonstrate an ability to adapt the physical examination procedures to the patient's age and/or condition. Include inspection, palpation, auscultation, and motion testing for systemic and musculoskeletal abnormalities.
4. Communicates effectively with attending, resident, team members and other health care professionals.
5. Documentation in medical records is legible.
6. Demonstrates the ability to integrate the principles of preventive medicine and health promotion in all interactions with patients, including lifestyle change recommendations when appropriate.
7. Demonstrates ability to develop and execute patient care plans appropriate for level of training and follows a problem oriented format (SOAP).
8. Demonstrate the ability to apply Osteopathic principles and treatment to this group of patients.

Practice Based Learning Objectives:

1. Demonstrates motivation and a desire to learn.
2. Demonstrates the ability to learn from practice.
3. Demonstrate the ability to understand and apply decision-making tools.
4. Describes quality assurance activities within the scope of the students clinical training
5. Demonstrates recognition of the importance of lifelong learning in medical/surgical practice.
6. Demonstrates the ability to obtain the best available evidence to answer a clinical question efficiently.
7. Demonstrate the ability to communicate evidence (including osteopathic principles and practices to patients and colleagues.
8. Seeks and responds to feedback.

Professionalism Objectives:

1. Demonstrates a respect for the right of the patient to be involved in the decisions about their care.
2. Demonstrates a commitment to continuity of patient care.
3. Demonstrates a respect and protection of confidential information
4. Displays a sense of responsibility and respect to patients, families, staff and peers.
3. Demonstrates cultural sensitivity.
4. Maintains a professional appearance, well-groomed, appropriately dressed.

5. Punctual in attendance, prompt and available when called upon.
6. Motivated to learn, shows appropriate assertiveness, flexibility, adaptability toward education.
7. Demonstrates appropriate attitude, cooperative, receptive to feedback.
8. Introduce self to those who you are working with, the patient, attending, resident, other physicians, nurses, staff, etc...

Systems Based Practice Objectives:

1. Know where to go for help— personal and professional.
2. Demonstrates an understanding of how to make an appropriate decision relative to the health care delivery systems
3. Attends all required orientations presented by the facility and completes needed paperwork for rotation.
3. Follows policy and procedures set forth by the health care facility and departments within that facility.
4. Recognizes common methods and available resources in health care systems to ensure quality of care.

3. Orientation to the Rotation

The rotation orientation provides an opportunity to answer questions and define roles, assess skill level and experience, set expectations, and anticipate and proactively resolve problems. The student should try to meet with the preceptor either prior to or early on the first day of the rotation. Clarifying the following details with the preceptor will help to ensure a rewarding and successful rotation:

- a. Student responsibilities on the service.
- b. Preceptor expectations of the student on the service.
- c. Goals, objectives, and the structure of the rotation.
- d. Required rotation assignments and responsibilities in the preceptor's practice (e.g. clinics, lectures, conferences, other didactics, journal clubs, rounds, office hours, morning report).
- e. Discuss the Evaluation of Student Clinical Performance form.
- f. The student should ask for feedback several times during the rotation, especially at mid-rotation. In addition, he/she should be prepared to share past clinical experiences and personal objectives for this rotation with the preceptor.

4. Required Learning Activities, Assignments, and Responsibilities for ALL PNWU STUDENTS in order to earn credit for this rotation.

The following activities are required for satisfactory completion of this rotation:

- a. Attend and participate in at least 70% of PNWU education day presentations (remote access is acceptable). This is a graduation requirement.
- b. Attend and participate in any other workshops, seminars, or professional development activities assigned by the PNWU Regional Dean.
- c. Present clinical case conferences, as assigned by the Director Clinical Rotations.

- d. Submit the online Student Evaluation through New Innovations. If you need instructions, please ask your PNWU or site staff.
- e. Submit Procedures Log through New Innovations.
- f. Submit a copy signed by your preceptor of the log summary (from New Innovations) at the end of this rotation.
- g. Fulfill all required responsibilities identified by the preceptor during orientation.

5. Student Performance Evaluation

A student must receive a passing grade from the preceptor in order to pass the rotation. If the preceptor considers the student *Marginal*, then a remediation recommendation should be made by the PNWU Regional Dean, in consultation with the preceptor, and submitted to the Director of Clinical Rotations Dean for approval.

6. Recommended Resources

Recommended Text:

Primer on The Rheumatic Diseases
Kelley's Textbook of Rheumatology
Up-to-Date in Rheumatology

The following have been identified as resources for ALL rotations by PNWU preceptors.

Cooper, D., H, Krainik, A., J., & Lubner, S., J. (2007). *The Washington manual of medical therapeutics*. (32nd ed.). Philadelphia: Lippincott Williams & Wilkins.

McPhee, S., J., Papadakis, M., A., & Tierney, L., M. (2007). *2007 Current medical diagnosis and treatment*. New York: McGraw-Hill. Also available on AccessMedicine

Ward, R. (2003). *Foundations for osteopathic medicine* (2nd ed.). Philadelphia: Lippincott Williams & Wilkins.

Medical Dictionary (Dorland, Taber or Stedman)

Available through the PNWU Library:

- PubMed (www.pubmed.gov)
- PNWU Library Catalog (<http://opac.libraryworld.com/cgi-bin/opac.pl?command=signin&libraryname=MLRC>)
- MD Consult with remote access (www.mdconsult.com)
- OSTMED.DR Osteopathic Medicine Digital Repository (<http://www.ostmed-dr.com:8080/vital/access/manager/Index>)

Interlibrary loan is available to PNWU COM students at no charge. Contact the library at 509-249-7745 or at library@pnwu.org for assistance. A complete list of library resources can be accessed by students by logging into the PNWU network and checking the Library page on Connections (<http://connections/Pages/Default.aspx>).

7. Standards of Professional Conduct

PNWU Honor Code applies to all activities in PNWU as well as the Regional campus sites.

Students are encouraged to study together and to share their knowledge freely with one another during the learning process. During examinations, however, no assistance from other students or from outside sources is allowed, unless explicitly permitted by the PNWU office. Books, notes, and other materials must be left at the periphery of the testing area during examinations.

Professional standards required of a member of the Osteopathic profession are a requirement for passing this rotation, as is compliance with the professional standards of the hospital and outpatient offices of the student's preceptor. Students are expected to maintain high professional standards of behaviors. They should exhibit such personal characteristics as honesty and integrity, as well as to maintain patient confidentiality at all times. Unprofessional behavior may result in a failing grade in this rotation, regardless of other academic performance on this rotation, and could subject the student to dismissal from the hospital in which they are based. Professional conduct shall be evaluated by the PNWU Regional Dean through observation of and interaction with the student, his/her preceptor, other hospital attending physicians and staff.

8. Tips for Successfully Completing the Rotation

Being successful on this rotation requires you to be a proactive student. Taking an interest in the specialty and becoming an active team member of the service is critical to learning in a clinical setting. Remember, the clinical learning environment differs from the classroom. You will be "thinking on your feet" and "learning as you go." To capitalize on "the learning moment," seek out opportunities to ask questions and speak up appropriately.

In addition, be sure to:

1. Review the syllabus to ensure that you understand all requirements.
2. Discuss with your preceptor your previous clinical experiences and personal goals and objectives for this rotation. The rotation orientation is an opportune time to initiate this discussion and to develop positive rapport with you preceptor.
3. Clarify your preceptor's expectations of your activities.
4. Complete your skills and procedure log as you proceed through the rotation; avoid procrastinating until the end.
5. Come prepared to take advantage of the opportunities this rotation has to offer.

If you have any questions, contact your Site Director, Coordinator or Regional Dean.
