

Remote Desktop Gateway Configuration

The Remote Desktop Gateway setting will allow secure connections to be made to PCs and Terminal Servers on campus without requiring a VPN connection.

1. Open *Remote Desktop Connection* from the Start menu.
2. Select *Options > Advanced tab*.
3. Select *Settings* from *Connect from anywhere*.
4. Under *Connection Settings*, select *Use these RD Gateway settings*.
5. Enter *gateway.pnwu.org* in the *Server name* field.

6. Click *OK*.
7. Return to the *General tab* and enter the name of the computer you wish to connect to.
8. Click *Connect*.
9. Enter network username including domain name and click *OK*.

Note: These settings will remain in effect for all future Remote Desktop connections.
